GLP-1 Research Menu

PRICING · TITRATION · VIAL DURATION

● Semaglutide BRC-1P

SINGLE-ACTION · WEGOVY / STEP PROTOCOL

The research compound behind Ozempic and Wegovy. Single-action GLP-1 agonist — the most widely-studied weight-research peptide in the world. Gentlest ramp, best-tolerated of the three.

- ✓ Reduces appetite & food noise
- ✓ Most-studied GLP-1 with real-world history

- ✓ Up to ~15% body weight loss in research
- ✓ Once-weekly — easy to remember

10 mg ★
\$60
\$6.00 / mg
25 mg/mL · 0.4 mL fill
MAINTENANCE DOSE
10u/wk · 0.10 mL
Covers wks 1–13 of titration · best \$/mg in class

TITRATION RAMP · 4 WEEKS PER STEP

1	0.25 mg/wk	START GENTLE Weeks 1–4
2	0.5 mg/wk	STEP UP Weeks 5–8
3	1.0 mg/wk	STEP UP Weeks 9–12
4	1.7 mg/wk	STEP UP Weeks 13–16
★	2.4 mg/wk	MAINTENANCE Week 17 onwards

FDA Wegovy label · STEP-1 NEJM 2021 · 2.4 mg/wk is the FDA-approved maintenance

● Tirzepatide BRC-2P

DUAL-ACTION · ZEPBOUND / SURMOUNT PROTOCOL

The research compound behind Mounjaro and Zepbound. Dual-action on GLP-1 and GIP receptors — strong appetite regulation plus improved metabolic signaling. The current standard for modern weight research.

- ✓ Hits two appetite pathways (GLP-1 + GIP)
- ✓ Often outperforms semaglutide head-to-head

- ✓ Up to ~21% body weight loss in research
- ✓ Once-weekly — set it & forget it

30 mg
\$90
\$3.00 / mg
100 mg/mL · 0.3 mL fill
MAINTENANCE DOSE
10u/wk · 0.10 mL
Covers wks 1–8 of titration

60 mg ★
\$170
\$2.83 / mg
100 mg/mL · 0.6 mL fill
MAINTENANCE DOSE
10u/wk · 0.10 mL
Covers wks 1–12 of titration · best supply duration

TITRATION RAMP · 4 WEEKS PER STEP

1	2.5 mg/wk	START GENTLE Weeks 1–4
2	5 mg/wk	STEP UP Weeks 5–8
3	7.5 mg/wk	STEP UP Weeks 9–12
★	10 mg/wk	MAINTENANCE Week 13 onwards
⊕	12.5 → 15 mg/wk	OPTIONAL MAX Wk 17+ / 21+

FDA Zepbound label · SURMOUNT-1 NEJM 2022 · 10 mg/wk is the standard target

● Retatrutide BRC-3P

TRIPLE-ACTION · TRIUMPH PROTOCOL

The newest generation of weight-research peptide. Targets GLP-1, GIP, and glucagon receptors simultaneously — combining appetite suppression, improved insulin response, and increased energy expenditure. Strongest results in recent clinical research.

- ✓ Triple-receptor: GLP-1 + GIP + glucagon
- ✓ Glucagon component supports energy burn

- ✓ Strongest results in modern research (17–24%)
- ✓ Once-weekly — minimal disruption

24 mg
\$140
\$5.83 / mg
100 mg/mL · 0.24 mL fill
MAINTENANCE DOSE
10u/wk · 0.10 mL
Covers wks 1–9 of titration · test + early ramp

48 mg
\$270
\$5.63 / mg
100 mg/mL · 0.48 mL fill
MAINTENANCE DOSE
10u/wk · 0.10 mL
Covers wks 1–13 of titration · ramp through P3

TITRATION RAMP · 4 WEEKS PER STEP (AFTER TEST)

0	1 mg	TEST DOSE Week 1 only
1	2 mg/wk	START Weeks 2–5
2	4 mg/wk	STEP UP Weeks 6–9
3	6 mg/wk	STEP UP Weeks 10–13
4	8 mg/wk	STEP UP Weeks 14–17
★	10 mg/wk	MAINTENANCE Week 18 onwards
⊕	12 mg/wk	OPTIONAL MAX Week 22+

TRIUMPH-4 Lilly 2025 · Jastreboff NEJM 2023 · 10 mg/wk is the community target

Gansulin Pen

\$70

AUTOMATIC · ONE-HANDED · 3ML CARTRIDGE

Spring-driven press-and-done injection · Clear dose viewing window · Audible click confirmation · 1-60u in 1-unit increments · Lightweight daily-use build · One-time purchase, works with all BR cartridges

Also available: **Tesa/lpa Blend** (GH stack, daily microdose) · **Cagrilintide** · **KLOW Blend** · see pricing sheet for companion compounds

All cartridges ship ready-to-inject — no mixing, no BAC water, no powder · Refrigerate immediately at 2-8°C · Use within 30 days of first injection · Doses shown for Gansulin pen (U-100: 1 mL = 100 units) · ★ = best value tier (best \$/mg + longest supply)
